STRIKE RICH ORE DIES AT HOTEL AT BULLION-BECK

Hands Out \$10,000 in Velvet Man Who Prospected Nevada Large Ore Body Found on 300 for Fifty Years Passer Level of Old Bo-Away. nanza.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their

Before leaving Mason valley, Mr. Orem declares that the citizens there subscribed for \$50,000 worth of the bond issue for the road. Bonds have also been taken up in the east, so that the road is now assured. Mr. Orem declares that it will now be rushed through as fast as men and money can get the work done.

At the Nevada Douglas property, Mr. Orem says that the incline has been straightened up and the size increased. In doing so he declares some large ore bodies have been discovered and are now being developed. Heavy machinery will shortly be installed at the property, and the company will then be ready to take up a large amount of systematic work that has been laid out. The Mason Valley mine, Mr. Orem declares, is opening out in splendid shape.

During his trip there he said he was through the mine. "Everything looks excellent for the future of the Mason Valley," said Mr. 431/2 Orem. "The stockholders need not worry about the company having a They now have enough ore in sight to make the property a paying proposition. They are continuing to develop more ore, and it is hard to say

Ho, for Dixie.

TELEPHONES 729 Breeden Office Supply Co. 60 West 2nd So. Special rate for St. George fruit festival today. Join the crowd and repesent the intermountain metropolis. Salt Lake Route, 169 South Main.

comes Uninteresting and Dull.

Conditions on the local stock exchange fropped to dullness yesterday, and during the entire day trading was uneventful. In spite of the effort of the brokers to arouse enthusiasm, it made no difference. Just the reason for the present condition in stocks is hard to fathom out. About one of the best excuses was advanced by a broker yesterday. He declared that the public had all the stock it wanted and was afraid to either buy or sell.

In spite of the depressing market, Colo-

the Rexall Silver & Copper Mining company's property, between Alta and South Fork, the management believes that it will soon find the ore body which it is searching for. The tunnel is now in a distance of 700 feet, and the present contract calls for an additional 100 feet of tunneling. This will bring the tunnel underneath the deepest shaft of the property. By the time the tunnel reaches its objective point, Secretary Sam S. Porter believes that considerable good ore will be encountered. The company owns five claims between the Cardiff and Columbus Consolidated properties. As the property is on the ridge it was found impractical to develop it with a shaft. A tunnel was therefore driven. At five shafts on the property ore has been encountered that varies from 15 ounces to 300 ounces of silver. Shaft No. 1, which is an incline down 65 feet, has two feet of carbonates carrying 52 ounces in silver. Shaft No. 2 is down 200 feet and ore there carried 120 ounces in silver. Ore has been found in several places that ran as high as 46 per cent lead, 62 ounces in silver and \$4.60 in gold. Southeast of the property is the 6id Toledo property, which prior to 1350 yielded \$250,000. San Francisco Quotations. James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private wire:	Calumet & Arizona 190 106 105% 105% 105% Con. Mercur 20 20 20 20 20 20 20 20 20 20 20 20 20	the Next Ninety Days. "We expect to have the new Nevada Copper Belt railroad finished into Mason valley within the next ninety days, and we have every confidence that we will be able to cut considerable off of that time," was the statement made by W. C. Orem, general manager of the road and the Nevada Douglas mines yesterday. Mr. Orem has been in the Mason valley district for several weeks arranging the details for the building of the road. The contracts, he says, that have been let call for the road to be finshed in ninety days. The contract for the grading from Wabuska on the Southern Pacific, where the new road will branch off to Yerington, has been let to W. J. Moran of Ogden. This will be put through as quickly as possible and equipped with temporary rails. Between 40,000 and 50,000 ties are now on the way to the railroad station, and seventy-one carloads of steel rails have also been shipped.	Ibex Gold I. Queen I. Queen I. the Rexall Silver & Copper Mining company's property, between Alta and South Fork, the management believes that it will soon find the ore body which it is searching for. The tunnel is now in a distance of 700 feet, and the present contract calls for an additional 100 feet of tunneling. This will bring the tunnel underneath the deepest shaft of the property. By the time the tunnel reaches its objective point, Secretary Sam S. Porter believes that considerable good ore will be encountered. The company owns five claims between the Cardiff and Columbus Consolidated properties. As the property is on the ridge it was found impractical to develop it with a shaft. A tunnel was therefore driven. At five shafts on the property ore has been encountered that varies from 15 ounces to 300 ounces of silver. Shaft No. 1, which is an incline down 65 feet, has two feet of carbonates carrying 52 ounces in silver. Shaft No. 2 is down 200 feet and ore there carried 120 ounces in silver. Ore has been found in several places that ran as high as 46 per cent lead, 62 ounces in silver and \$4.60 in gold. Southeast of the property is the 6ld Toledo property, which prior to 1880 yielded \$250,000. San Francisco Quotations. James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private wire: Bid. Asked. "We expect to have the new Nevada Copper Belt railroad finished into Mason valley within the next ninety days, and we have every confidence that we will be able to cut considerable off of that time," was the statement made by W. C. Orem, general manager of the road and the Nevada Douglas mines yesterday. Mr. Orem has been in the Mason valley district for several weeks arranging the details for the building of the road. The contracts, he says, that have been let call for the road to be finshed in ninety days. The contract for the grading from Wabuska on the Southern Pacific, where the new road will branch off to Yerington, has been let to W. J. Moran of Ogden. This will be put through as quickly as possible and equipped with temporary rails. Between 40,000 and 50,000 ties are now on the way to the railroad station, and seventy-one carloads of steel rails have also been shipped. Before leaving Mason valley, Mr. Orem declares that the citizens there subscribed for \$50,000 worth of the bond issue for the road. Bonds have also been taken up in the east, so that the	Ibex Gold I. Queen I. Queen I. Local Mining Exchange Be- New York Security Seller Blames Local Men for Conditions.

> On the condition of the local stock market many eastern houses are criticizing local brokers and the low prices that are brought to bear. For some and not only will you all admire the time it has been contended that local way the properties are managed, but in not giving their customers fuller formation relative to Tintic and Bingham properties. One of the strongest letters to come out against the Salt Lake brokers is the weekly market letter of Charles A. Stonham & Co. of New

> cussion of the condition of Tintic stocks, and specifically it recites that Colorado, with a capitalization of \$200,000, with shares at 20 cents, has paid \$1,710,000, or 855 per cent of the capitalization. Sioux Consolidated it is show has paid 73 per cent on the capitaliza- Will Now Drift Four Ways On

tion. Continuing, the letter says:
"We repeat that if the ordinary investor bought any other stock, at say \$2 a share, and realized 1 cent a month as the dividend return, and 7 cents a month in increased market price, with these dividends of 1 cent and the market increase of 7 cents continued each and every month he would consider that he had had a most wonderful return on the investment. When we first called the attention of our customers to Colorado, Mr. Knight was in better financial the property, who has just returned in making our deductions as regards the actual intrinsic merit of the investment, we left Mr. Knight out of consideration altogether and figured on the actual value which was behind the security. In stronger hands, or, in fact, in the hands of most of the people in the east to such an extent that it could not be who are handling miles and the people in the east to such an extent that it could not be who are handling mining stocks, Colorado would be selling today at \$10 per share, and perhaps a great deal more, but even if it were, it would not alte the fact that the same intrinsic value is behind the shares at \$2 as there would be at \$10, and, therefore, we claim that Colorado is a much better investment at the price than if it were selling for to be getting better ore than in any

Sioux Consolidated.

"The same applies to Sioux Consolidated as well, and you can look over the mining list on the mining exchanges and curbs, and we challenge you, and we challenge anybody with stock to sell or stock to boom, to show us where on any of these exchanges or curbs there is anything with as much value behind it giving returns within 50 per cent of what Colorado and Sioux Consolidated are paying today.

been for the past several years, con- pleted and the laying of steel has besistently and persistently advising the sale of these stocks. At the original site is being graded. prices at which they advised the sale of At the Ray Consolidated property the nging investor would have lost by not buying them, or, that brokerage firms of their standing, ings. because of personal reasons, would give my investigations within the last few months I found that there was not 1 per cent of the Salt Lake brokers who are so willing to all the brokers who are so will be capable of carry-four hours. are so willing to distribute information and spend several days underground. This little talk is simply in the best because of differences of opinion, it is the earnest wish of the writer that they will never injure or in any way affect the friendships that he way affect the friendships that he way affect the friendships that he way affect the priendships that he way affect the priendship that he way affect the pr fect the friendships that he prizes so are pounding away and blocking out much, but again we state to the Salt an enormous tonnage of ore. The drills Lake brokers, it is time to put on your are now proving up that the ore body i

off and pay a visit to Tintic. Compares Stocks.

"There is no place in any camp in this country, and the writer knows them all, where you can buy the equal of Colorado mining right now at \$10 a share, where you can buy anything like Sioux Consolidated for \$4 or \$5 a share where you can buy anything as good as Iron King for \$1.50 a share. There is nothing on the New York curb, there is Columbus, 1906-11/2c, 5006/11/2c, 5006/11/

"Perhaps the question will be asked why Mr. Knight does not jump in and buy all the Colorado that is offered. Well, Mr. Knight, like many others, requires the money that he is receiving in dividends from Colorado to take care of other things which up to the present time are not so successful, and knowing that Colorado is able to take care of itself, he is devoting his attention to others, many of which, in the end, will turn out to be good investments.

sale of Ely stocks. Bingham, which is within one hour's ride of Salt Lake City, and where the principal operations are above ground, so that they would not have to soil their clothes is a fixed that has prevented as provented practically unknown to the Salt Lake brokers, except from the map, and the only doubtful commendation that can be passed to these brokerage firms is the fact that on general principles they are willing to go short of something they do not own. The day of reckoning, however, is close at hand. Sioux Consolidated, for instance, by the time the next dividend period arrives, will have something like three months' dividends, at the rate of 7 cents per month, in its at the rate of 7 cents per month, in its at the rate of 7 cents per month, in its than any other deal that has been pu treasury. The property is looking as through in a long time. The property well as ever. Colorado will undoubted- all lays along the famous old black ledge Well as ever. Colorado will undoubtedly go on paying dividends at the pressent or an increased rate for several years, so that finally people like Jesse Knight and Colonel Loose, through their connection with the properties in the Tintic camp, will dominate the market because of actual value and as against the brokers who are now so successful in depressing the price of these issues.

Main Support.

Well as ever. Colorado will undoubtedly go on paying dividends at the pressent or an increased rate for several years, so that finally people like Jesse Knight and Colonel Loose, through the early days. The Obio-Kentucky has a large amount of ore already blocked out in its own property, and a good amount can also be secured in the Utah-Nevada property as soon as developed their connection with the properties in the Tintic camp, will dominate the market because of actual value and as against the brokers who are now so successful in depressing the price of these issues.

Main Support.

"In going over these matters we would like to call the attention of our fellow brokers in Salt Lake City to the fact that the stocks representing Tintic properties, and particularly those under the management of Mr. Knight

The Central Coal & Coke company.

"In day lays along the famous old black ledge from which many millions of dollars were thereous particular were also be secured in the Utah-Nevada property as

seats would not be selling at a premium as they are now and many of those who are so strong and active in knocking the different Tintic issues would be practically starving to death. On Tintic more than any other one camp, Mr Salt Lake Broker, your future depends. The stocks representing them will undoubtedly be up and down and fluctuate like any other class of stocks. Perhaps some will not turn out as well as expected, while others will turn out to be a great deal better than either you or we believe, but if you have made up your mind altogether to desert Tintic we advise you to take a car and first go down and visit the camp and then compare general conditions at Tintie with those at any camp in this country, Mexico, Canada or elsewhere, and you will be sure to go back to Tintic brokers were standing in their own light your customers will obtain more for their money, many times over, than in any other camp in the whole country.

ter of Charles A, Stonham & Co. of New York. The letter opens with a general discussion of the condition

400 Level-Other Arizona News.

The water level has been encountered in the Jce Bush shaft at the Inspiration property, and the company has decided to drift from the 400-foot level, says Henry Crumb, consulting engineer for condition than at present, perhaps, but from Arizona. The shaft, it is said, has been in very wet ore for some time, but the gasoline hoist and buckets have been able to handle the water. At the 400-foot level it was decided that greater handled with the present machinery For that reason it was thought best to commence drifting on the 400 level Drifting has been started and drifts will be sent out in four directions.

For the past 310 feet the shaft has been all in ore of better than 2½ per cent. The bottom of the shaft is said other part of the work, and before leaving Mr. Krum says that he secured samples running as high as 4 and 5 per

Drilling is being continued in other parts of the property. Although the drills have struck the ore, there has been nothing of a definite nature accomplished so far. It is believed that the drills will prove up a body of ore as large as any of those in the vicinity. The railroad from Globe to the Miami property, which will also be of advantage to the Inspiration, is well under The Salt Lake brokers are, and have way. The grading has nearly been com-
